More Talk

About Time.

Some people are peculiar in the matter of buying a Watch. A silver Watch is good enough for one man so long as it keeps good time. Another one wants something a little more showy---a gold one,---but it, too, must keep good time. Some want a high-priced Watch, others a cheaper one, but after all everybody wants a correct timepiece. We selected our stock with time in view, and can sell you a high, low or medium-priced Watch
--and, any of them will keep time---the
essential point.
We repair Watches so that we can guarantee them to keep time. Charges low.

BALLENGER, Jeweler

South Side Second Street.

OUR WASHINGTON MAN.

OTON, March 12th, 1897 A plain American citizen:-that is what

A pian American citteen.—that is what President McKindey has shown binneif in this the first week of his occupancy of the Presidential office.

There were no "frills" about his inaugural address, no unecessary exclusiveness in any part of his share of the day's doings, and when he became master of the White House its doors were thrown opon, and day after day throngs of people from every action and state have ple from every section and state have been received by him. The surviving members of his old Regiment, the Tweamembers of his old Regiment, the Twes-ty third Ohlo, called upon him the day following his inauguration, and not for many years have the walls of the White House echeed such runging cheers as those with which they greeted their old comrade and commander. The Jay's work over, this statesman and plain American citizen donned his hat and overcost, and for the first time in many years there was witnessed the spectralic years there was witnessed the spectaci of a President of the United States walkof a President of the United States wask-lng unattended through the streets of Washington. This habit, which was characteristic of General Grant, has been characteristic of General Grant, has been revived by that other Otho soldier, Major McKiniay, and stroilers on Pennsylvania Avenue now doff their hats to the Presi-dent of the United States as he walks by, and in return receive a pleasant saluta-

tlon from him. PLANS OF THE ADMINISTRATION. PLANS OF THE ADMISISTRATION.
The plans of the Administration, as outlined by President McKinley's inaugural address, are received with the most cordial approval by members of all parties. I say all parties, but I must withdraw that statement so far as relates to the silver Repub-llcans. These men, who were ence mem hers of the party which President McKinie now represents, are the only men the entire Nation who seem to find no good word for the sound American sentiments of his inaugural address. Democrats, ever Populists, speak in the warmest terms of him and the Amarican principles enuncl ated by bim, but from the men who re-cently deserted their party come no good words for any sentiment arising from its

INTERNATIONAL BIMETALLISM

The return of Senator Wolcott, coupled with President McKiniey's ringing utterances in favor of an international bimetalilc conference, gives great encouragement to the friends of that sentiment. Sanato Wolcott reports unusual interest in this subject on the continent and even in Eng-land, and is hopeful of results. President McKinley's clear terse utterances on this subject leave no daubt as to bis intentions and there is reason to believe that within a few weeks definite steps will be taken to bring about a conference of the leading held during the year 1897.

HON. W. C. HALBERT of Vanceburg is prominently mentioned for the Republican nomination for Circult Judge in

AFTER all, the farmers of the United States are not the worst off people in the world. Their total products last year, according to the Bepartment of Agriculture, are valued at \$1,500,000,000. Of this amount the corn alone is valued at 500 millions, the hay at 400 millions, the wheat at 300 millions, the oats at 130 millions and the potatoes at 75 millions. These figures are given in round numbers because they are more easily remembered, but they are sub-stantially those of the Department. Every farmer will want to remember them and to remember that the farmers of the United States are, when the country is in its normal state and condition, the most prosperous of those of any part of the world.

are strong, so'id and lasting. Like the violin they improve with usage. Durability is a claim made for all pianos, but it is the chief merit of the Gabler Pianos. There are Like

40,000 in Use

now, and there would not be so many were not the Gabler remarkable for tone, touch and finish as well as for durability. Listen to it and learn its excellence. We are sole representa-tives for the Steinway Piano.
